

Universal PC/TFT holder for Small Form Factor PC and TFT displays

With this PC/TFT holder Fujitsu Siemens Computers offers an universal unit to combine a small Desktop PC and a TFT display to one ergonomic unit to save valuable space.

The PC/TFT holder is a flexible solution for “all in one” requirements. The desktop is fixed in vertical position behind the display, still with easy access to all components.

This PC/TFT holder even upgrades your TFT display in use to ergonomic improved equipment, for example with height adjustment.

Sample: ESPRIMO E with 19" TFT

- Integrates desktops with different dimensions in vertical position
- Usable for different TFT displays with industry-standard VESA mounting
- TFT display at this holder has
 - Easy height adjustment for better ergonomics
 - 90° rotation for viewing in portrait orientation
 - Tilt range
- Cable cover for hidden from view
- Belt to fix system unit on holder
- Handle integrated in design for carrying
- Integrated holes in bottom plate for fixation on table or wall
